Teaching English in Japan

"The program introduced me to so many different avenues for teaching English in Japan. The diverse classes that we visited gave me a lot to think about!"

-Rachel Stacey, Summer 2019

This program will provide students with foundational knowledge necessary for a career in TESOL. Students in this program participate in the following activities:

TESOL Methods Course (3 credits)

Students will learn the basics of communicative language teaching, observe EFL classes in Japan, and gain a deeper understanding of English language teaching in the Japanese context.

Classroom observation, field trips, and cultural experiences

Students will observe a variety of EFL classes at multiple levels. Travel to historic and culturally rich locations and hands-on cultural experiences arranged by JCMU are also integrated into the program.

Japanese Culture & Society Course (3 credits)

This course explores the history, values, and behavior of the Japanese people, providing a more holistic view of the country in order to provide context for TESOL course.

Housing is provided in the JCMU Residence Hall apartments.
